16 December 1958

**MEMORANDUM FOR: Director of Operations, DPS/DCI**

**THROUGH : Deputy Director, DPS/DCI**

**SUBJECT : Pilots' Post Flight Report Summary**

**REFERENCE : Memorandum for SA/PD/DCI, dated 5 November 1958,  
same subject, from Director of Operations (Chal 0390)**

1. After some delay I have read the referenced document with care and I find it most interesting. It is valuable to have this summary of our experience.

2. I understand that action is going forward on all the problems described in this paper that have not as yet been satisfactorily solved. Most of these relate to personal equipment or the ship's oxygen system and are product improvement problems. The primary responsibility for these rests with Operations. I will be interested to learn from time to time of further progress being made.
